

STRATEGY FOR TRANSFORMATORY EDUCATION AND GLOBAL JUSTICE

2019 - 2021

OBJECTIVES

GENERAL GOAL

Promote a commitment to ocular health

Promote changes in values and attitudes that encourage the commitment of the citizenship to advance towards a fairer and more equalitarian world where visual health is guaranteed to everyone, especially women and children.

SPECIFIC GOAL

Raise awareness about the inequalities

Raise awareness about the existent inequalities in the world and, in special, related to health shortage, contributing to the consciousness of these unfair realities.

SPECIFIC GOALS

Generate critical attitudes and changes on behavior

Generate critical attitudes and behavioral changes forwarded to the fight against poverty, ensuring the commitment and implication of the citizens in equitable access to ocular health.

LINES OF ACTION

Awareness

Appreciation of the ocular health reality of the peoples of the countries in which Eyes of the World works: acknowledgment and understanding of inequalities and the improving objectives at the International level and social mobilization, Implication in the solution based on the denunciation of situations that create a violation of the right to vision, gender inequalities and the demandability of rights.

Training

Training focused on the educational field through creative projects and examples that bring the reality of avoidable blindness to school centers, with accompaniment to teachers and direct involvement of students.

Investigation

Research and dissemination of studies and research conclusions about the vulnerability in access to the ocular health of the population of the South.
